

Substances of Very High Concern Declaration

Version 1.0
Date: 4 February 2026

Product: Terluran®

Dear Customer,

The publication of the "SVHC Candidate List" according to Article 59(1) of Regulation EC No. 1907/2006 (REACH) triggers a number of obligations for the European market.

Article 31(1) REACH requires among others the supplier of a substance included in the "SVHC Candidate List" to provide the recipient with a safety data sheet.

Furthermore, Article 33 REACH requires the supplier of an article containing a SVHC substance in a concentration above 0.1 % (w/w) to provide the recipient in the EU with, as a minimum, the name of that substance.

Please be advised that based on the information available to us from our raw material suppliers the current product listed above doesn't contain as intentionally added additives or ingredients any of the Substances of Very High Concern (SVHC) above a concentration of 0.1 % w/w of the SVHC Candidate List, article 59 (1, 10) as published by ECHA **4 February 2026 (253 chemicals)**. Should our state of knowledge change, we shall inform you accordingly.

Please note that these substances have not been banned from use. Listing on the SVHC list only indicates that these substances may become subject to authorization.

Please note that this declaration is only valid for prime products.
